LIA NEXTRIM

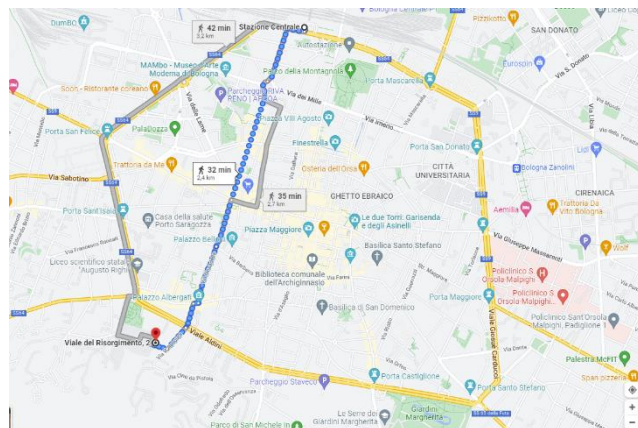

LIA NextRIM is an interactive laboratory for sustainable mobility and infrastructures of the future. The new structure was born from an agreement between the University of Bologna and the Université Gustave Eiffel to start research collaborations and educational initiatives at an international level.

Solutions for the transport of the future, support for the digitalization of cities, new services for mobility, innovative technologies for the safety and sustainability of infrastructures are the main issues that will be addressed in the Next Generation Road Infrastructure and Mobility laboratory.

SIMUR MASTER

The Master's Degree aims to train technicians specialized in the design and management of urban and regional mobility in the road, rail and airport sectors.

The II level master wants to train the following professionals:

- Project manager for projects and maintenance of the infrastructural heritage of cities, metropolitan areas, unions of municipalities;
- Mobility manager for cities, institutions, companies able to use and exploit innovative techniques for transport management.
