

UNIBO MAPATHON

OpenStreetMap 2025

OpenStreetMap

OpenStreetMap (OSM) is a free map of the entire world that is constantly created and

edited by millions of volunteers around the world through a process of collaborative mapping (crowdmapping) that can help providing and updating maps for areas of the world that do not have one; their availability is crucial to support emergency operations in case of disasters.

In the frame of the **OpenStreetMap Geography Awareness Week 2025**, the area of **Geomatics at DICAM Dept.** will host an in-presence Mapathon event, open to all the students.

NOVEMBER 18TH 2025, H 15:15

Room VIII, Viale del Risorgimento 4, Bologna

The OSM project will be introduced during the event and the participants will be assisted in their first steps. Mapping actions related to **climate change** and **extreme weather events** will be performed using **remote sensing satellite imagery**.

- **THIS COLLABORATIVE MAPPING ACTIVITY IS OPEN TO EVERYONE**
- **NO PREVIOUS EXPERIENCE OR SPECIFIC SOFTWARE IS REQUIRED**
- **BRING YOUR OWN LAPTOP AND AN EXTERNAL MOUSE**
