

Stein Haugen is professor at the Norwegian University of Science and Technology (NTNU) in Trondheim. His main area of interest is major accidents, with focus on probability of accident occurrence, major accident theories, major accident indicators, risk analysis and safety culture. He holds more than 30 years of experience in industry and at NTNU, performing risk analysis for oil and gas applications, developing new risk assessment methods, giving advice on how to use the results of risk analysis, and lecturing at courses and conferences.
