Pre-Announcement of ECCSELLENT Transnational Access call 2024

The Italian National Node, in the framework of the ECCSELLENT (Development of ECCSEL-R.I. Italian facilities: user access, services and long-term sustainability) project will launch a call for proposals for transnational access in May 2024. The call will fund access to Italian facilities that are part of ECCSEL ERIC and is open to applications from European industry, SMEs, Universities, and Research Institutes.

The aim of the ECCSELLENT project is to upgrade most of the Italian facilities of ECCSEL ERIC and to expand the Italian Node to promote the development and internationalisation of Italian research in the full chain of CCUS (carbon capture, utilisation, transport, and storage).

As part of the ECCSELLENT project, the Italian Node will launch a Transnational Access call aims to improve access, visibility, sustainability and continuous expansion of services provided by Italian ECCSEL facilities. The call will follow ECCSEL ERIC access rules. Further details, including a list of available facilities, will be available at the opening of the call in May 2024.

Each project will be reviewed by a panel formed by the Italian National Node.
